PROFILE

Electronics and Communication Engineering student with strong interest in software development and problem solving. Passionate about building efficient web applications and learning new technologies.

EDUCATION

B.Tech in Electronics and Communication Engineering 2022 – 2026
National Institute of Technology Calicut, Kozhikode
Current CGPA: **7.56**

Higher Secondary Education (12th Grade) 2019 – 2021
St. Antony's HSS, Mutholy, Kottayam
Scored **96%** in DHSE Board

Secondary Education (10th Grade) 2018 – 2019
GHS Pooyappally, Kollam
Scored **100%** in State Board

SKILLS

Languages	JavaScript, C++, SQL, Python
Frameworks & Tools	Node.js, Express.js, React, PostgreSQL, Postman
Concepts	Object-Oriented Programming (OOP), Operating Systems, DBMS, Data Structures and Algorithms (DSA)

COURSES

Udemy Data Structures and Algorithms

PROJECTS

Expense Tracker Backend
Personal Project

- Developed a modular backend using **Node.js**, **Express.js**, and **PostgreSQL**.
- Implemented secure **JWT-based authentication** for user login and route protection.
- Designed RESTful APIs to handle CRUD operations for **users**, **accounts**, and **transactions**.
- Code: github link

E-Commerce Backend
Personal Project

- Built a scalable backend for an e-commerce platform using **Node.js**, **Express.js**, and **PostgreSQL**.
- Integrated **Razorpay payment gateway** for order payments with server-side order creation.
- Implemented **Razorpay webhooks** to securely verify and handle payment success and failure events.
- Designed RESTful APIs for managing **products**, **orders**, **payments**, and **users**.
- Code: github link

Multi Patient Vital Monitoring And Triage System
Final Year Engineering Project

- Developed an **IoT-based wearable monitoring system** for rapid patient assessment in emergency and mass-casualty scenarios.
- Collects critical vital parameters including **heart rate (HR)**, **blood pressure (BP)**, and **SpO_2** from multiple patients simultaneously and **classifies patient urgency**.
